SUMMARY

I am a researcher and educator specializing in safe, secure, and sustainable autonomy for advanced aerial mobility (AAM) applications. I develop **decision-making, planning, and control algorithms** for autonomous systems operating in uncertain, energy-constrained, and adversarial environments. Currently, I am a postdoctoral research scholar at the Institute for Software Integrated Systems at Vanderbilt University. Prior to Vanderbilt, I received my Ph.D. in Aerospace Engineering at The George Washington University, and completed two research internships at MathWorks.

RESEARCH INTERESTS

Theory: Optimal Control, Reinforcement Learning, Physics-Informed Machine Learning, Optimization, Estimation Theory.
Application: Multi-agent Trajectory Planning, Air Traffic Management, Aviation Electrification, Risk Assessment and Contingency Management, Security of Cyber-Physical Systems.

Testing Platforms for Novel AAM Concepts

• eVTOL Simulators • sUAS Hardware Flight Testing • Battery Digital Twins • UAM/UAS Transportation Networks

EDUCATION

George Washington University

Ph.D. in Aerospace Engineering,

Washington, DC

Jan. 2021 - Aug. 2025

Dissertation title: *Enhancing Safety and Energy Efficiency in Advanced Air Mobility Through Trajectory Planning and Mission Feasibility Assessment Strategies*

Advisor: Prof. Peng Wei

North Carolina Agricultural and Technical State University

Ph.D. in Electrical and Computer Engineering (Transferred Before Completion)

Greensboro, North Carolina

Aug. 2019 - Dec. 2020

Addis Ababa Science and Technology University

B.S. in Electro-Mechanical Engineering,

Addis Ababa, Ethiopia

Sep. 2012 - June 2017

Thesis: *Modeling and Control of an Autonomous Forklift for EPHARM Pharmaceuticals*

Advisor: Prof. Solomon Gudeta

Class Rank: 1st out of 183, GPA: 3.97/4.00

RESEARCH & INDUSTRY EXPERIENCE

Postdoctoral Research Scholar, Vanderbilt University

Supervisors: Prof. Bryan C. Ward, Prof. Gautam Biswas

Nashville, Tennessee

Oct. 2025 - present

Focus: Securing AAM operations and cyber-physical systems against cyberattacks

Research Intern, Sensor Fusion and Tracking Toolbox, MathWorks

Supervisors: Prashant Arora, Dr. Elad Kivelevitch

Natick, Massachusetts

May 2023 - Aug. 2023

- Conducted research on multi-object tracking algorithms (JPDA, PHD, MHT) to facilitate in-depth performance evaluation
- Built a MATLAB application to design and analyze multi-object tracking algorithms
- Demonstrated effectiveness using real-world radar data in aircraft landing approach scenarios

Research Intern, MathWorks Advanced Research and Technology Office, MathWorks

Supervisors: Dr. Roberto Valenti, Dr. Pieter Mosterman

Natick, Massachusetts

May 2022 - Aug. 2022

- Developed a decentralized, highly scalable trajectory planning framework for urban air mobility
- Developed an online learning algorithm to approximate aircraft reachable sets via a discrepancy function
- Demonstrated a significant reduction in near-midair collisions in large-scale simulations

MAJOR PROJECTS

Securing High-Density Urban Airspaces

Oct. 2025 - Onward

Supervisors: Prof. Bryan C. Ward, Prof. Gautam Biswas

- Leading a team of six research engineers on a **\$6M NASA-funded University Leadership Initiative (ULI)** project
- Developing algorithms to identify vulnerabilities in AAM systems
- Designing defense strategies against cyberattacks and improving system-level resilience and security

In-Time Learning-Based Safety Management for Scalable AAM Operations

Mar. 2021 - May 2024

Supervisor: Prof. Peng Wei

- Led the first thrust of a **\$2.5M NASA-funded System-Wide Safety** project
- Proposed a mission risk assessment framework to evaluate the impact of adverse weather on flight safety
- Demonstrated the framework's effectiveness in real-world-inspired scenarios, including drone package delivery and urban air taxi services

Safe, Scalable, and Energy-Efficient Trajectory Planner for AAM Operations

Jan. 2021 - Aug. 2025

Supervisor: Prof. Peng Wei

- Developed a real-time, multi-agent trajectory planner for AAM operations
- Utilized a data-driven reachability analysis approach for on-the-fly safety verification
- Proposed a scalable Markov decision process (MDP) framework to optimize trajectories for energy efficiency

Learning-based Li-ion Battery Modeling for Contingency Management

Sept. 2022 - Aug. 2025

Supervisor: Prof. Peng Wei

- Developed a data-driven battery model using Neural ODEs and Physics-Informed Neural Networks to address the computational limitations of traditional electrochemical models
- Achieved a $33\times$ speedup in battery state prediction and mission risk assessment compared to model-based approaches
- Illustrated the efficacy of the method on a realistic drone package delivery scenario

Energy Demand Analysis for eVTOL Aircraft in Urban Air Mobility

Sept. 2023 - Dec. 2024

Supervisor: Prof. Peng Wei

- Developed a predictive framework to forecast charging demand for electric vertical takeoff and landing (eVTOL) aircraft
- Integrated energy consumption models with mission specifications, wind forecasts, and charging behaviors to estimate aggregated power demand at vertiports.
- Illustrated the efficacy of the framework on a large scale realistic air taxi operation

TEACHING EXPERIENCE

Academy of College Teaching (ACT) Certificate ([Description](#))

Awarded by Vanderbilt University Institute for the Advancement of Higher Education (AdvancED)

Spring 2026

Teaching Assistant

GWU MAE 4182 - Electro-Mechanical Control Systems

Fall 2024

Role: Substitute lectures, weekly office hours and recitations, creating assignments

GWU Informal Seminar - Verifying Cyber-Physical Systems

2022 - 2023

Role: Initiating the seminar, presenting each chapter from the book *Verifying Cyber-Physical Systems*, leading discussions

NCA&T ECEN 4682/6682 - Genetic Algorithm

Spring 2020

Role: Weekly office hours and recitations, mentorship on final projects, mentorship on academic and professional life

MENTORSHIP EXPERIENCE

Undergraduate Students

Jairo Sanchez, Mechanical and Aerospace Engineering, George Washington University

Spring 2023

Tharun Saravanan, Computer Science, George Washington University

Summer 2023

Liza Mozolyuk, Mechanical and Aerospace Engineering, George Washington University

Summer 2023

Jeremiah Webb, Computer Science, Vanderbilt University ([Resulted in 1 DASC publication](#))

Fall 2025 - present

Graduate Students

Alex Zango, Mechanical and Aerospace Engineering, George Washington University

Spring 2025

Bryce Bjorkman, Computer Science, Vanderbilt University

Fall 2025 - present

Cai Lemieux-Mack, Computer Science, Vanderbilt University

Fall 2025 - present

TECHNICAL SKILLS

Programming Skills: Python, MATLAB/Simulink, C/C++, Julia
Packages: PyTorch, PSOPT, Gurobi, BlueSky, Gymnasium
Operating Systems: Linux, Windows, ROS
Standards: Familiar with DO-178C certification process

HONORS AND AWARDS

Honorable Mention Award, AIAA Young Professionals, Students, and Educators (YPSE) Conference	2022
Student Travel Grant for AIAA AVIATION	2022, 2024
Student Travel Grant for AIAA SCITECH	2024, 2025
Ambassador of Science and Technology of the Graduation Class of 2017, Ministry of Science and Technology of Ethiopia	2017
Mid Academic Life Prize, AASTU	2014

PROFESSIONAL AFFILIATIONS

American Institute of Aeronautics and Astronautics (AIAA), Member
 Institute of Electrical and Electronic Engineers (IEEE), Member
 Institute for Operations Research and the Management Sciences (INFORMS), Member

PROFESSIONAL SERVICE

Conference Session and Workshop Organizer

<i>Workshop Co-Host</i>	<i>Apr. 2025</i>
